# City of Greenbelt, Maryland

## Overview of Financing Options for Refunding Opportunities

June 2020

- At the request of the City of Greenbelt (“City”) staff, Davenport & Company LLC (“Davenport”), in our capacity as municipal advisor to the City, has prepared this summary of financing options related to the potential refunding of the City’s outstanding Series 2011 (Tax-Exempt) and 2013 (Taxable) Bonds.
  - The purpose of refunding the Series 2011 and 2013 Bonds would be to take advantage of lower interest rates currently available in the market resulting in debt service savings for the City.
  - The debt service savings realized from these refundings would provide the City with additional financial flexibility that would be important particularly in light of potential budgetary pressures resulting from the COVID-19 pandemic.
- The remainder of this presentation summarizes the City’s financing options, examines various pertinent considerations, and outlines a plan for moving forward.

# Refunding Candidates

- A refunding is a refinancing of outstanding debt at lower rate of interest.
  - Analogous to refinancing your home mortgage.
  - Refunding savings can be realized as either level or upfront savings (see Slide 3), depending upon the City's budgetary needs.
- Interest rates for tax-exempt and taxable borrowings are hovering near historically low levels, presenting a favorable environment to refund existing debt.
  - It is impossible to predict how long rates will remain this favorable.
- Below is a summary of the Series 2011 and 2013 bonds that are currently outstanding and have been identified as refunding candidates for the City.

| Issuance                       | Amount Outstanding | Current Interest Rate | Maturities to be Refunded | Call Provision |
|--------------------------------|--------------------|-----------------------|---------------------------|----------------|
| Series 2011 Bonds (Tax-Exempt) | \$1,771,996        | 2.93%                 | 8/1/2020-8/1/2026         | Anytime        |
| Series 2013 Bonds (Taxable)    | \$2,282,641        | 5.30%                 | 7/12/2020 – 12/12/2033    | Anytime        |

# Realizing Refunding Savings

## Level Savings

- Annual debt service is reduced by an equal amount in each year remaining until final maturity

## Upfront Savings

- Savings realized in earliest year(s) with debt service in remaining years unchanged

# Financing Option #1 – General Obligation Bond Public Sale

- The City has the ability to issue General Obligation Refunding Bonds in a public sale without going to referendum.
  - Public sale would allow the City to lock in a fixed interest rate for the life of the bonds.
- A public sale would require the City to prepare an Official Statement and obtain a credit rating(s), which are required to market the bonds.
  - Initial rating(s) that reflect the City’s credit profile would be pursued and established. We believe the City would be able to obtain a high-grade rating of at least Aa3 (second-highest rating tier), if not higher.
  - City would be able to utilize the rating(s) to help obtain a lower cost of funds on any future debt transactions whether in the public market or through a bank.
- Additional document and rating requirements influence transaction costs and time of City staff needed to successfully execute the public transaction.
  - City staff would also be required to meet continuing disclosure requirements to keep investors informed once debt has been publically issued.
- While the public sale process would take about three months to complete, and requires a slightly higher cost of issuance and staff time, this financing option would still **result in the lowest cost of funds or highest debt service savings for the City.**

| Series 2011 and 2013 | Option #1 – Public Sale | Option #2 – Direct Bank Loan |
|----------------------|-------------------------|------------------------------|
| Level Savings        | \$597,946               | \$396,156                    |
| Upfront Savings      | \$539,977               | \$340,803                    |

# Financing Process Flow Chart

# Financing Option #1 – Series 2011 GO Bond Public Sale

## Level Savings

- Results in \$75,011 of net budgetary savings, or 3.86% NPV savings, which is above the 3% industry benchmark.

| Summary of Refunding Results       |                                    |                    |                           |
|------------------------------------|------------------------------------|--------------------|---------------------------|
| Net Budgetary Savings <sup>1</sup> | Present Value Savings <sup>1</sup> | Negative Arbitrage | All-In True Interest Cost |
| \$75,011                           | \$68,368                           | \$0                | 1.87%                     |
|                                    | 3.86% of Refunded                  |                    |                           |

| Debt Service Comparison |                    |                        |                       |
|-------------------------|--------------------|------------------------|-----------------------|
| Fiscal Year             | Prior Debt Service | Refunding Debt Service | Net Budgetary Savings |
| 2021                    | \$290,631          | \$282,153              | \$8,479               |
| 2022                    | 317,052            | 308,625                | 8,427                 |
| 2023                    | 317,052            | 306,125                | 10,927                |

| <b>Total</b>            | <b>\$3,194,427</b> | <b>\$2,725,558</b>     | <b>\$468,869</b>      |

Notes:

- Savings net of estimated cost of issuance of \$100,000 combined for both series and \$5.00/bond for underwriter's discount.
- All numbers are preliminary, subject to change. Actual results may vary significantly.

# Financing Option #2 – General Obligation Direct Bank Loan

- The City has the ability to issue General Obligation Refunding Bonds through a direct bank loan (“DBL”) without going to referendum.
  - Fixed interest rate through maturity could not be guaranteed particularly on the Series 2013 refunding, which has a 14-year amortization.
  - Prepayment provisions tend to be more flexible than in public sale transactions.
- A DBL would not require the City to prepare an Official Statement or obtain a credit rating.
  - Davenport would draft a Request for Proposal (“RFP”) that would outline the refunding opportunities and the applicable terms and would distribute that RFP to local, state, and national banks for response.
  - Once RFP responses are received, Davenport would prepare a bid summary and discuss recommendations with the City and Bond Counsel.
  - Since no additional documentation (before and after the transaction) or ratings are required, the demand for city staff time is minimal.
- While the DBL process would take slightly less time to complete (6-8 weeks) and reflects a lower cost of issuance, this financing option actually **results in a higher cost of funds or lower debt service savings for the City**, as public market rates are more competitive.

| Series 2011 and 2013 | Option #1 – Public Sale | Option #2 – Direct Bank Loan |
|----------------------|-------------------------|------------------------------|
| Level Savings        | \$597,946               | \$396,156                    |
| Upfront Savings      | \$539,977               | \$340,803                    |

# Financing Option #2 – Series 2011 GO Direct Bank Loan

## Level Savings

- Results in \$39,406 of net budgetary savings, or 1.53% NPV savings, which is below the 3% industry benchmark.

\* Public Issuance Costs include Underwriter's Discount, Financial Advisor, Bond Counsel, Rating Fees, and printing among others. Bank Loan includes Financial Advisor and Bond Counsel.

# Recommendation – Dual Track Approach

---

- Given the considerations outlined in this presentation, Davenport would recommend that the City pursue a **“Dual Track Approach”** for its refunding opportunity.
- Under a Dual Track Approach, the City would simultaneously solicit funding proposals for a direct bank loan while preparing for a potential public sale.
- Davenport, on behalf of the City, would solicit financing proposals from local, regional, and national banks via a competitive Request for Proposals (“RFP”) process.
  - This is the same process that Davenport assisted the City with last year in relation to the TIF financing.
- With firm bank bids in hand, the City can determine the most favorable approach for the financing.
- Soliciting proposals would not cost the City anything, nor would it obligate the City in any way to move forward with a direct bank loan.
  - In this way, the City can unbiasedly weigh any proposals received against current market estimates for a public sale.

# Next Steps – Tentative Financing Schedule

---

- Week of June 22, 2020: Davenport to draft RFP for City’s review.
- July 1, 2020: Davenport distributes RFP to local, regional, and national banks.
- July 14, 2020 Council introduces and adopts ordinance for refunding bonds.
- July 22, 2020: RFP responses due from banks.
- July 23-24, 2020: Davenport to prepare summary of RFP responses for City.
- July 27, 2020 Review RFP responses with City and compare results with public bond sale.
- July 29, 2020 : City to make decision on whether to pursue bank loan or public bond sale.
- July 30, 2020: City to begin to prepare for public bond sale, if desired option.

# Municipal Advisor Disclosure

The U.S. Securities and Exchange Commission (the “SEC”) has clarified that a broker, dealer or municipal securities dealer engaging in municipal advisory activities outside the scope of underwriting a particular issuance of municipal securities should be subject to municipal advisor registration. Davenport & Company LLC (“Davenport”) has registered as a municipal advisor with the SEC. As a registered municipal advisor Davenport may provide advice to a municipal entity or obligated person. An obligated person is an entity other than a municipal entity, such as a not for profit corporation, that has commenced an application or negotiation with an entity to issue municipal securities on its behalf and for which it will provide support. If and when an issuer engages Davenport to provide financial advisory or consultant services with respect to the issuance of municipal securities, Davenport is obligated to evidence such a financial advisory relationship with a written agreement.

When acting as a registered municipal advisor Davenport is a fiduciary required by federal law to act in the best interest of a municipal entity without regard to its own financial or other interests. Davenport is not a fiduciary when it acts as a registered investment advisor, when advising an obligated person, or when acting as an underwriter, though it is required to deal fairly with such persons,

This material was prepared by public finance, or other non-research personnel of Davenport. This material was not produced by a research analyst, although it may refer to a Davenport research analyst or research report. Unless otherwise indicated, these views (if any) are the author’s and may differ from those of the Davenport fixed income or research department or others in the firm. Davenport may perform or seek to perform financial advisory services for the issuers of the securities and instruments mentioned herein.

This material has been prepared for information purposes only and is not a solicitation of any offer to buy or sell any security/instrument or to participate in any trading strategy. Any such offer would be made only after a prospective participant had completed its own independent investigation of the securities, instruments or transactions and received all information it required to make its own investment decision, including, where applicable, a review of any offering circular or memorandum describing such security or instrument. That information would contain material information not contained herein and to which prospective participants are referred. This material is based on public information as of the specified date, and may be stale thereafter. We have no obligation to tell you when information herein may change. We make no representation or warranty with respect to the completeness of this material. Davenport has no obligation to continue to publish information on the securities/instruments mentioned herein. Recipients are required to comply with any legal or contractual restrictions on their purchase, holding, sale, exercise of rights or performance of obligations under any securities/instruments transaction.

The securities/instruments discussed in this material may not be suitable for all investors or issuers. Recipients should seek independent financial advice prior to making any investment decision based on this material. This material does not provide individually tailored investment advice or offer tax, regulatory, accounting or legal advice. Prior to entering into any proposed transaction, recipients should determine, in consultation with their own investment, legal, tax, regulatory and accounting advisors, the economic risks and merits, as well as the legal, tax, regulatory and accounting characteristics and consequences, of the transaction. You should consider this material as only a single factor in making an investment decision.

The value of and income from investments and the cost of borrowing may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions or companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance and estimates of future performance are based on assumptions that may not be realized. Actual events may differ from those assumed and changes to any assumptions may have a material impact on any projections or estimates. Other events not taken into account may occur and may significantly affect the projections or estimates. Certain assumptions may have been made for modeling purposes or to simplify the presentation and/or calculation of any projections or estimates, and Davenport does not represent that any such assumptions will reflect actual future events. Accordingly, there can be no assurance that estimated returns or projections will be realized or that actual returns or performance results will not materially differ from those estimated herein. This material may not be sold or redistributed without the prior written consent of Davenport.
